

# Timeline

This is still a work in progress. But I have put it here because you might find it useful.

There are some interesting things with people's lifespans being so long. For example, Noah's father was born while Adam was still alive! And Noah himself was still alive when Abraham was born! I wonder if they talked about the flood.

Adam was still alive when Abraham's father was born.

Lifespans are in green. Books of the Bible are blue. Other events are red.

If an event has "dotted" lines at one end, like Cain's life, that means I can't find anything in the Bible to pin down a date, but it's a good approximation.
